ANNUAL INDEX

Control Engineering Volume 15 . . . January–December 1968

(WN) What's New (ABL) Around the Business Loop (D&S) Devices & Systems (ED) Editorial

Actuators

A look at electric valve actuators. C. S. Beard....Apr. 83
Another look at electric valve actuators. C. Beard....Dec. 79
Binary jacks convert digits to positions. (D&S)....Feb. 63
High resolution stepper helps set type. (D&S)....Jan. 44
Hydraulic motor controls tube drawing. (D&S)....Mar. 49
Plunger motor steps totalizing readout. (D&S)....July 60
Stepping motors run at 8,000 pps. (D&S)....Nov. 59

Aircraft

Deflection transducers tell plane's weight. (D&S)....Apr. 70
F-111 computers checked out in test complex. (D&S)....May 63
Inertia meter predicts performance of escape system. (D&S)....Aug. 52
Miniature tape cartridges sound the alarm. (D&S)....Apr. 74
Strapdown-inertial techniques broaden VTOL horizons. Buffum & Tribken Apr. 95
Study hydrofluidic and electronic control systems for aircraft. (WN) Aug. 42
Temperature controls for airplane windows reduce replacement. (D&S) Dec. 55

Air traffic control

Eurocontrol computer for air space control. (WN)....Apr. 60
FAA may shrink size of giant radar displays. (WN)....Nov. 46

Amplifiers

AC power control—triac or scr's? D. Cooper....Aug. 80
Fluidic amplifier works at zero pressure. (D&S)....Mar. 52
Improved op amp offered. (WN)....Feb. 56
Magnetically controlled diode has many applications. (D&S)....June 82

Analog-to-digital conversion

Circuit for synchro-to-digital conversion. F. G. Roberts....Jan. 65
Hybrid computers aid process control. E. B. Sharpe....Aug. 69
Line frequency noise rejection in A-D converters. D. Velasevic....Aug. 73
Simple circuit multiplies analog and digital signals (D&S)....May 64

Around the business loop

AT&T's new tariff permits customer-owned attachments....Oct. 151
Air pollution instrumentation: strong growth foreseen....Sept. 127
Bowles forecasts huge fluidics market. Dec. 117
Computer system houses plug builder-user gap....Apr. 129
Display survey....June 169
Government prods for standards....Aug. 109
On-line computers in the lab: big jump in next five years....Feb. 123
Plated wire memories gain ground in aerospace....Nov. 127
Programmable sequence controllers Mar. 109
See big market for small core memory systems....May 119
Test instrument report: biz keen on rental scene....Jan. 101
The lucrative loop around the loop. July 111

Batch processing

On-line blending for production profit. Tillman & Lee....Oct. 111
Pneumatic crossbar controls fermentation sequence. Yamashita & Ito....Jan. 68

Checkout, automatic

F-111 computers checked out in test complex. (D&S)....May 63
On-line computer tests carburetors. (D&S)....Apr. 72
Video recorder checks out assembly machine. (D&S)....Apr. 70

Circuits

Bond graphs for logic circuit design. A. Krigman....Feb. 91
Circuit for synchro-to-digital conversion. F. G. Roberts....Jan. 65
Controlling electrical noise in instrument circuits. B. Klipec....Mar. 75
Designing asynchronous sequential logic circuits. Wareberg & Mergler....Oct. 99
Micro flaws checked by macro technique. (D&S)....Sept. 68
Noiseproof a digital electronic control system. L. O. Rexrode....Nov. 66
Pulse rate function multiplier is simple and accurate. (D&S)....Dec. 60
Stepping motors run at 8,000 pps. (D&S)....Nov. 59

Coding

Encoded tracks tell train location. (D&S)....Mar. 54
USASCII—8 interchange code adds an eighth bit. E. H. Clamons....July 76
USASCII: federal government action on standards challenges computer manufacturers. J. N. Bairstow....Aug. 84

Components

AC power control—triac or scr's? D. Cooper....Aug. 80
Another look at electric valve actuators. C. Beard....Dec. 79
Display buyer's guide. M. J. Kashman June 111
Display characteristics. Control Engineering staff....June 94
Display survey. (ABL)....June 169
Electric-to-fluidic transducer uses frequency modulation. (D&S)....Sept. 65
High resolution stepper helps set type. (D&S)....Jan. 44
IC regulator powers high performance systems. (D&S)....Feb. 63
Improved op amp offered. (WN)....Feb. 56
Magnetically controlled diode has many applications. (D&S)....June 82
New automatic control valve announced. (WN)....May 46
New phosphor makes infrared visible. (WN)....June 72
Proximity sensor-switch actuates casing machine. (D&S)....Sept. 70
SCR-controlled circuit breaker advances steelmaking. (WN)....Mar. 39
Solenoid valve has one moving part. (D&S)....Jan. 39
Special synchros for function generation. C. Lang....Dec. 75
Stepping motors run at 8,000 pps. (D&S)....Nov. 59
Three-hundred-ft cable operates barge's throttle. (D&S)....May 68
Torque measurement without touching. (D&S)....May 63

Computer programming

Hybrid patent protection proposed for computer programs. (WN)....Nov. 43
Computer programming series 4—importance of software. S. Weaver....Jan. 60
Computer programming series 5—assembly vs. compiler languages. Kipiniak & Quint....Feb. 93
Computer programming series 6—FORTRAN for on-line control. Clough & Westerberg....Mar. 77
Computer programming series 7—software for a manufacturing line. E. C. McIrvine....Apr. 100
Computer programming series 8—fill-in-the-form programming. G. W. Markham....May 87
Computer programming series 9—a dde software package for a float glass process. N. R. Patel....July 68
Computer programming series 10—push-button programming for on-line control. S. J. Bailey....Aug. 76
Computer programming series 11—on-line programs from control logic diagrams. G. Turner....Sept. 102
Computer programming series 12—new process language uses English terms. T. G. Gaspar & others....Oct. 118
Computer programming series 13—dde software for a paper machine. Ochtman & Sullivan....Nov. 90
Computer programming series 14—need a process language standard. E. A. Weiss....Dec. 84
Computer system houses plug builder-user gap. (ABL)....Apr. 129
Information systems design: PL/1 spoken here. Bond & Dyer....Dec. 71
Weigh standard process control language. (WN)....Sept. 51

Computers
(see also information systems)

Aerospace systems find applications at dam sites. (WN)....Sept. 56
Computer leasing: Honeywell, GE change courses. (WN)....Jan. 27
Computer monitors and predicts gas demand. (D&S)....Nov. 60
Computer patents lash control industry. (WN)....July 39
Computer programming series 4—importance of software. S. Weaver....Jan. 60
Computer programming series 5—assembly vs. compiler languages. Kipiniak & Quint....Feb. 93
Computer programming series 6—FORTRAN for on-line control. Clough & Westerberg....Mar. 77
Computer programming series 7—software for a manufacturing line. E. C. McIrvine....Apr. 100
Computer programming series 8—fill-in-the-form programming. G. W. Markham....May 87
Computer programming series 9—a dde software package for a float glass process. N. R. Patel....July 68
Computer programming series 10—push-button programming for on-line control. S. J. Bailey....Aug. 76
Computer programming series 11—on-line programs from control logic diagrams. G. Turner....Sept. 102
Computer programming series 12—new process language uses English terms.

ANNUAL INDEX

Control Engineering Volume 15 . . . January–December 1968

(WN) What's New (ABL) Around the Business Loop (D&S) Devices & Systems (ED) Editorial

Actuators

A look at electric valve actuators. C. S. Beard....Apr. 83
Another look at electric valve actuators. C. Beard....Dec. 79
Binary jacks convert digits to positions. (D&S)....Feb. 63
High resolution stepper helps set type. (D&S)....Jan. 44
Hydraulic motor controls tube drawing. (D&S)....Mar. 49
Plunger motor steps totalizing readout. (D&S)....July 60
Stepping motors run at 8,000 pps. (D&S)....Nov. 59

Aircraft

Deflection transducers tell plane's weight. (D&S)....Apr. 70
F-111 computers checked out in test complex. (D&S)....May 63
Inertia meter predicts performance of escape system. (D&S)....Aug. 52
Miniature tape cartridges sound the alarm. (D&S)....Apr. 74
Strapdown-inertial techniques broaden VTOL horizons. Buffum & Tribken Apr. 95
Study hydrofluidic and electronic control systems for aircraft. (WN) Aug. 42
Temperature controls for airplane windows reduce replacement. (D&S) Dec. 55

Air traffic control

Eurocontrol computer for air space control. (WN)....Apr. 60
FAA may shrink size of giant radar displays. (WN)....Nov. 46

Amplifiers

AC power control—triac or scr's? D. Cooper....Aug. 80
Fluidic amplifier works at zero pressure. (D&S)....Mar. 52
Improved op amp offered. (WN)....Feb. 56
Magnetically controlled diode has many applications. (D&S)....June 82

Analog-to-digital conversion

Circuit for synchro-to-digital conversion. F. G. Roberts....Jan. 65
Hybrid computers aid process control. E. B. Sharpe....Aug. 69
Line frequency noise rejection in A-D converters. D. Velasevic....Aug. 73
Simple circuit multiplies analog and digital signals (D&S)....May 64

Around the business loop

AT&T's new tariff permits customer-owned attachments....Oct. 151
Air pollution instrumentation: strong growth foreseen....Sept. 127
Bowles forecasts huge fluidics market. Dec. 117
Computer system houses plug builder-user gap....Apr. 129
Display survey....June 169
Government prods for standards....Aug. 109
On-line computers in the lab: big jump in next five years....Feb. 123
Plated wire memories gain ground in aerospace....Nov. 127
Programmable sequence controllers Mar. 109
See big market for small core memory systems....May 119
Test instrument report: biz keen on rental scene....Jan. 101
The lucrative loop around the loop. July 111

Batch processing

On-line blending for production profit. Tillman & Lee....Oct. 111
Pneumatic crossbar controls fermentation sequence. Yamashita & Ito....Jan. 68

Checkout, automatic

F-111 computers checked out in test complex. (D&S)....May 63
On-line computer tests carburetors. (D&S)....Apr. 72
Video recorder checks out assembly machine. (D&S)....Apr. 70

Circuits

Bond graphs for logic circuit design. A. Krigman....Feb. 91
Circuit for synchro-to-digital conversion. F. G. Roberts....Jan. 65
Controlling electrical noise in instrument circuits. B. Klipec....Mar. 75
Designing asynchronous sequential logic circuits. Wareberg & Mergler....Oct. 99
Micro flaws checked by macro technique. (D&S)....Sept. 68
Noiseproof a digital electronic control system. L. O. Rexrode....Nov. 66
Pulse rate function multiplier is simple and accurate. (D&S)....Dec. 60
Stepping motors run at 8,000 pps. (D&S)....Nov. 59

Coding

Encoded tracks tell train location. (D&S)....Mar. 54
USASCII—8 interchange code adds an eighth bit. E. H. Clamons....July 76
USASCII: federal government action on standards challenges computer manufacturers. J. N. Bairstow....Aug. 84

Components

AC power control—triac or scr's? D. Cooper....Aug. 80
Another look at electric valve actuators. C. Beard....Dec. 79
Display buyer's guide. M. J. Kashman June 111
Display characteristics. Control Engineering staff....June 94
Display survey. (ABL)....June 169
Electric-to-fluidic transducer uses frequency modulation. (D&S)....Sept. 65
High resolution stepper helps set type. (D&S)....Jan. 44
IC regulator powers high performance systems. (D&S)....Feb. 63
Improved op amp offered. (WN)....Feb. 56
Magnetically controlled diode has many applications. (D&S)....June 82
New automatic control valve announced. (WN)....May 46
New phosphor makes infrared visible. (WN)....June 72
Proximity sensor-switch actuates casing machine. (D&S)....Sept. 70
SCR-controlled circuit breaker advances steelmaking. (WN)....Mar. 39
Solenoid valve has one moving part. (D&S)....Jan. 39
Special synchros for function generation. C. Lang....Dec. 75
Stepping motors run at 8,000 pps. (D&S)....Nov. 59
Three-hundred-ft cable operates barge's throttle. (D&S)....May 68
Torque measurement without touching. (D&S)....May 63

Computer programming

Hybrid patent protection proposed for computer programs. (WN)....Nov. 43
Computer programming series 4—importance of software. S. Weaver....Jan. 60
Computer programming series 5—assembly vs. compiler languages. Kipiniak & Quint....Feb. 93
Computer programming series 6—FORTRAN for on-line control. Clough & Westerberg....Mar. 77
Computer programming series 7—software for a manufacturing line. E. C. McIrvine....Apr. 100
Computer programming series 8—fill-in-the-form programming. G. W. Markham....May 87
Computer programming series 9—a dde software package for a float glass process. N. R. Patel....July 68
Computer programming series 10—push-button programming for on-line control. S. J. Bailey....Aug. 76
Computer programming series 11—on-line programs from control logic diagrams. G. Turner....Sept. 102
Computer programming series 12—new process language uses English terms. T. G. Gaspar & others....Oct. 118
Computer programming series 13—dde software for a paper machine. Ochtman & Sullivan....Nov. 90
Computer programming series 14—need a process language standard. E. A. Weiss....Dec. 84
Computer system houses plug builder-user gap. (ABL)....Apr. 129
Information systems design: PL/1 spoken here. Bond & Dyer....Dec. 71
Weigh standard process control language. (WN)....Sept. 51

Computers
(see also information systems)

Aerospace systems find applications at dam sites. (WN)....Sept. 56
Computer leasing: Honeywell, GE change courses. (WN)....Jan. 27
Computer monitors and predicts gas demand. (D&S)....Nov. 60
Computer patents lash control industry. (WN)....July 39
Computer programming series 4—importance of software. S. Weaver....Jan. 60
Computer programming series 5—assembly vs. compiler languages. Kipiniak & Quint....Feb. 93
Computer programming series 6—FORTRAN for on-line control. Clough & Westerberg....Mar. 77
Computer programming series 7—software for a manufacturing line. E. C. McIrvine....Apr. 100
Computer programming series 8—fill-in-the-form programming. G. W. Markham....May 87
Computer programming series 9—a dde software package for a float glass process. N. R. Patel....July 68
Computer programming series 10—push-button programming for on-line control. S. J. Bailey....Aug. 76
Computer programming series 11—on-line programs from control logic diagrams. G. Turner....Sept. 102
Computer programming series 12—new process language uses English terms.

T. G. Gaspar & others ..... Oct. 118
Computer programming series 13—ddc software for a paper machine. Ochtman & Sullivan ..... Nov. 90
Computer programming series 14—needed: a process language standard. E. A. Weiss ..... Dec. 84
Computer replaces hardwired control on transfer line. (D&S) ..... July 56
Computer supervises oil well drilling. (WN) ..... Feb. 54
Computer system houses plug builder-user gap. (ABL) ..... Apr. 129
Computers outdate hardwired controls. J. A. Reason ..... Jan. 46
Computers take over NC. (WN) ..May 56
Controlling data flow in a steel mill. H. G. Teschner ..... Apr. 76
DDC workshop loses punch. (WN) June 66
Digital proliferation—minicomputers revisited. G. Lapidus ..... Nov. 72
Digital simulation checks aircraft combat role. (D&S) ..... Nov. 60
Eurocontrol computer for air space control. (WN) ..... Apr. 60
F-111 computers checked out in test complex. (D&S) ..... May 63
Firms unveil new data processing gear. (WN) ..... Apr. 55
GE launches computer-directed NC activity. (WN) ..... Oct. 70
GE regroups information systems equipment division. (WN) ..... Apr. 58
Government prods for standards ..Aug. 109
Graphic displays: matching man to machine for on-line control. D. E. Weisberg ..... Nov. 79
Hewlett-Packard computer to tackle process control. (WN) ..... Oct. 69
Honeywell unveils new process control computer package. (WN) ..... Nov. 50
Hybrid computers aid process control. E. B. Sharpe ..... Aug. 69
Hybrid patent protection proposed for computer programs. (WN) ....Nov. 43
Inter-airline reservation system nears contract award stage. (WN) ...Aug. 40
Minicomputers—what all the noise is about. G. Lapidus ..... Sept. 73
Monitoring process data—a practical design approach. F. A. Kramer. ...Oct. 105
Multiprocessor computers for better on-line control. Hoffman & Ragel ..Feb. 75
On-line computer scorecard updated. S. J. Bailey ..... July 79
On-line computer tests carburetors. (D&S) ..... Apr. 72
On-line computers in the lab: big jump in next five years. (ABL) ..... Feb. 123
On-line system dispenses instant money. (D&S) ..... May 66
Papermill computer worked perfectly—on paper. (WN) ..... June 57
Penn Central's computer controlled freight yard. (D&S) ..... June 80
Philips bares computer business plans. (WN) ..... Mar. 40
Plated wire memories gain ground in aerospace. (ABL) ..... Nov. 127
Reliance Electric enters computer control system arena. (WN) ..... Oct. 69
Russian computers for sale. (WN) May 54
Satellite computers speed airline reservations. C. M. Cundall ..... Nov. 88
See big market for small core memory systems. (ABL) ..... May 119
Small computer keeps tabs on vehicle maintenance. (D&S) ..... July 60
Status report on random access mass storage. B. M. Blake ..... Mar. 65
The lucrative loop around the loop. (ABL) ..... July 111
Three ways to do root locus on computers. G. E. Cook & others ..... Jan. 70
Weigh standard process control language. (WN) ..... Sept. 51
Woodward Corp. pushes toward integrated control. (WN) ..... July 44
World computer war: Britain readies big gun. (WN) ..... June 60

Computing control

A look into Apollo control systems. G. Lapidus ..... Dec. 67
Circuit for synchro-to-digital conversion. F. G. Roberts ..... Jan. 65
Computer control loses some steam at LP&L. (WN) ..... May 45
Computer patents lash control industry. (WN) ..... July 39
Computer picks right resistors ....Feb. 66
Computer programming series 4—importance of software. S. Weaver Jan. 60
Computer programming series 5—assembly vs. compiler languages. Kipiniak & Quint ..... Feb. 93
Computer programming series 6—FORTRAN for on-line control. Clough & Westerberg ..... Mar. 77
Computer programming series 7—software for a manufacturing line. E. C. McIrvine ..... Apr. 100
Computer programming series 8—fill-in-the-form programming. G. W. Markham ..... May 87
Computer programming series 9—a ddc software package for a float glass process. N. R. Patel ..... July 68
Computer programming series 10—push-button programming for on-line control. S. J. Bailey ..... Aug. 76
Computer programming series 11—on-line programs from control logic diagrams. G. Turner ..... Sept. 102
Computer programming series 12—new process language uses English terms. T. G. Gaspar & others ..... Oct. 118
Computer programming series 13—ddc software for a paper machine. Ochtman & Sullivan ..... Nov. 90
Computer programming series 14—needed: a process language standard. E. A. Weiss ..... Dec. 84
Computer replaces hardwired control on transfer line. (D&S) ..... July 56
Computer supervises oil well drilling. (WN) ..... Feb. 54
Computer system houses plug builder-user gap. (ABL) ..... Apr. 129
Computers outdate hardwired controls. J. A. Reason ..... Jan. 46
Computers take over NC. (WN) ..May 56
Console controls Houston climate (D&S) ..... Feb. 64
Controlling data flow in a steel mill. H. G. Teschner ..... Apr. 76
DDC workshop loses punch. (WN) June 66
Duke Power orders DDC system, training simulator. (WN) ..... May 46
FAA may shrink size of giant radar displays. (WN) ..... Nov. 46
FCC bans ban on foreign attachments. (WN) ..... Aug. 37
Foxboro cities success at Fawley. (WN) May 48
GE launches computer-directed NC activity. (WN) ..... Oct. 70
Hewlett-Packard computer to tackle process control. (WN) ..... Oct. 69
Honeywell unveils new process control computer package. (WN) ..... Nov. 50
Hybrid patent protection proposed for computer programs. (WN) ....Nov. 43
Low cost analog computer controls batch process. (D&S) ..... Dec. 56
Minicomputers—what all the noise is about. G. Lapidus ..... Sept. 73
Monitoring process data—a practical design approach. F. A. Kramer. .Oct. 105
Multiprocessor computers for better on-line control. Hoffman & Ragel ..Feb. 75
NKK reports complete computer control of steel production. (WN) .....Nov. 44
On-line computer scorecard updated. S. J. Bailey ..... July 79
On-line computer tests carburetors. (D&S) ..... Apr. 72
Papermill computer worked perfectly—on paper. (WN) ..... June 57
Penn Central's computer controlled freight yard. (D&S) ..... June 80
Power backup for supervisory computer. (D&S) ..... Aug. 56
Plated wire memories gain ground in aerospace. (ABL) ..... Nov. 127
Practical data base design. D. S. Ward May 83
Reliance Electric enters computer control system arena. (WN) ..... Oct. 69
Set DDC system for power plant. (WN) Jan. 27
Set on-line computer for nuclear generator. (WN) ..... Mar. 40
Siemens computers find wide application. (WN) ..... Mar. 40
Sperry losses traffic control contract. (WN) ..... Feb. 58
Steel companies order controls. (WN) Aug. 44
Strapdown-inertial techniques broaden VTOL horizons. Buffum & Tribken Apr. 95
Textile plant expands computer control. (WN) ..... Mar. 39
Weigh standard process control language. (WN) ..... Sept. 51
Westinghouse computer to control cold mill. (WN) ..... Dec. 50
Woodward Corp. pushes toward integrated control. (WN) ..... July 44

Controllers

Closing the loop with predictive controllers. C. R. Kelley ..... May 75
Controlling the flow rate of dry solids. Grader & Bateson ..... Mar. 60
Demand widens for instrument evaluation. (WN) ..... June 68
Plunger motor steps totalizing readout. (D&S) ..... July 60
Programmable sequence controllers. (ABL) ..... Mar. 109
Self-organizing controllers—part I. R. Barron ..... Feb. 70
Self-organizing controllers—part II. R. Barron ..... Mar. 69
Self-synchronizing control offers new control capabilities. C. L. Mamzic May 70
Strapdown-inertial techniques broaden VTOL horizons. Buffum & Tribken Apr. 95
Temperature controls for airplane windows reduce replacement. (D&S) Dec. 55
What's available in program timers. J. A. Reason ..... July 62

Data collection (see also Information systems)

Hall effect generator on chip works as keyboard switch. (D&S) ..... Oct. 90
Input terminal accepts mark-sense cards. (D&S) ..... Mar. 50
New recorder produces readable tape. (WN) ..... Sept. 52
Status board concept applied to people finding. (D&S) ..... Aug. 52
Touch-tone sets give drug store dope. (D&S) ..... Jan. 42
What's available for in-plant data collection. L. E. Waltz ..... Feb. 79

Data processing (see also Information systems)

Aerospace systems find applications at dam sites. (WN) ..... Sept. 56
Firms unveil new data processing gear. (WN) ..... Apr. 55
New recorder produces readable tape. (WN) ..... Sept. 52
On-line computers in the lab: big jump in next five years. (ABL) ..... Feb. 123
On-line system dispenses instant money. (D&S) ..... May 66

Data transmission (see also Information systems)

AT&T's new tariff permits customer-owned attachments. (ABL) .....Oct. 151
Accuse AT&T of 'strangulation.' (WN) Jan. 28

FCC bans ban on foreign attachments. (WN) ..... Aug. 37
Five ways to delay a signal. P. Bauer Apr. 92
Four ways to multiplex low-level signals. H. Abernethy ..... May 92
GT&E introduces new carrier systems. (WN) ..... Apr. 60
Line frequency noise rejection in A-D converters. D. Velasevic ..... Aug. 73
RACE narrows digital voice bandwidth. (WN) ..... July 48
USASCII—8 interchange code adds an eighth bit. E. H. Clamons ..... July 76
USASCII: federal government action on standards challenges computer manufacturers. J. N. Bairstow .. Aug. 84
What's available for high-speed data transmission. L. E. Walz ..... Oct. 94

Dead-time

Five ways to delay a signal. P. Bauer Apr. 92

Detection

Candid cameras keep eye on crossings. (D&S) ..... Apr. 70
Eddy current probes check brake cylinders. (D&S) ..... Apr. 69
Fluidics positions roll without touching. (D&S) ..... Apr. 69
Proximity sensor-switch actuates casing machine. (D&S) ..... Sept. 70
Ultrasonics finds faults in plywood (D&S) ..... Feb. 68

Digital-to-analog conversion

Binary jacks convert digits to positions. (D&S) ..... Feb. 63

Digital techniques
(see also Information systems)

Curvilinear rate multiplier for precise interpolation. G. C. Winston .... Apr. 81
Encoded tracks tell train location. (D&S) ..... Mar. 54
Programmable sequence controllers. (ABL) ..... Mar. 109

Direct digital control

DDC workshop loses punch. (WN) June 66
Disclose second DDC system at ideal cement. (WN) ..... Feb. 56
Duke Power orders DDC system, training simulator. (WN) ..... May 46
Foxboro cites success at Fawley. (WN) May 48
Set DDC system for power plant. (WN) Jan. 27

Display of data
(see also Information systems)

Display buyer's guide. M. J. Kashman June 111
Display characteristics. Control Engineering staff ..... June 94
Display survey. (ABL) ..... June 169
Displays in action. O. E. McBrien & others ..... June 125
FAA may shrink size of giant radar displays. (WN) ..... Nov. 46
Five ways to illuminate an instrument. H. N. Nicholson ..... Nov. 86
Graphic display keeps thieves at bay. (D&S) ..... Jan. 42
Graphic displays: matching man to machine for on-line control. D. E. Weisberg ..... Nov. 79
Keyboards keep croupiers' count. (D&S) Mar. 52
New graphic display packs 'em in. (WN) ..... Oct. 72
Physiological display alerts doctors. (D&S) ..... Mar. 50
Planar panel makes multicolor display. (D&S) ..... Feb. 66
Plunger motor steps totalizing readout. (D&S) ..... July 60
Satellite computers speed airline reservations. C. M. Cundall ..... Nov. 88
Selecting the right display technique. B. M. Blake ..... June 88
Small display gives phone visual response (D&S) ..... Feb. 64
Special report on displays. Control Engineering staff ..... June 94
Specifying custom display systems. R. J. Masterson & others ..... June 119
Status board concept applied to people finding. (D&S) ..... Aug. 52
What's ahead in displays. G. J. Chafaris June 115

Editorials

Building a control ladder ..... Dec. 138
Control displays—a two-dimensional problem ..... June 184
Dynamic status quo ..... Mar. 124
Experiments are to learn from..... Feb. 138
Find and fix—fast ..... Nov. 144
Fresh package, familiar contents .. Jan. 116
Makinophobia ..... Sept. 140
Mini's on the move ..... May 134
Systems engineering for a profit.... July 126
The balance of control ..... Oct. 164
The reorganization man ..... Aug. 124
Wanted: control engineers ..... Apr. 144

Education

Announce more short courses in control. (WN) ..... May 50
Short summer courses in control. W. Kramer ..... Apr. 88
The urban crisis: opportunity for control technology. W. Kramer .... Mar. 56
What's new in control standards. E. Mastascusa ..... May 95

Environmental control

Console controls Houston climate (D&S) Feb. 64
The urban crisis: opportunity for control technology. W. Kramer ..... Mar. 56

Flow, solids

Controlling the flow rate of dry solids. Grader & Bateson ..... Mar. 60

Fluidics

Analog fluidics grades cylinder bores. (D&S) ..... Jan. 39
Bowles forecasts huge fluidics market. (ABL) ..... Dec. 117
Corning to offer analog fluidics. (WN) Dec. 44
Electric-to-fluidic transducer uses frequency modulation. (D&S) .... Sept. 65
Europe has more to show in fluidics. (WN) ..... July 42
Fluidic amplifier works at zero pressure. (D&S) ..... Mar. 52
First fluidics show draws big. (WN) Dec. 40
Fluidics positions roll without touching. (D&S) ..... Apr. 69
Fluidics show: topics announced. (WN) Nov. 56
Fluidics worldwide—activity stepped up. (WN) ..... Sept. 52
Honeywell sells fluidic controls to England. (WN) ..... June 64
Improved vortex rate sensor. (D&S) Oct. 88
Key control patents issued. (WN) .Dec. 46
Slate first annual fluidics conference. (WN) ..... Aug. 46
Study hydrofluidic and electronic control systems for aircraft. (WN) .... Aug. 42
Why they're losing money in fluidics. J. A. Reason ..... Aug. 65

Foreign control

Chinese computer hoes the mark. (WN) Sept. 62
Computer programming series 10—push-button programming for on-line control. S. J. Bailey ..... Aug. 76
Computer programming series 11—on-line programs from control logic diagrams. G. Turner ..... Sept. 102
Europe has more to show in fluidics. (WN) ..... July 42
Fluidics worldwide—activity stepped up. (WN) ..... Sept. 52
NKK reports complete computer control of steel production. (WN) ..... Nov. 44
New computers highlight IEA exhibition. (WN) ..... Aug. 37
Philips bares computer business plans. (WN) ..... Mar. 40
Russian computers for sale. (WN) .May 54
Sequence control for batch polymerization. F. H. Schreiner ..... Sept. 96
Siemens computers find wide application. (WN) ..... Mar. 40
U.S. firms set up shop in Israel. (WN) June 70
World computer war: Britain readies big gun. (WN) ..... June 60

Frequency response

Plotter facilitates graphical analysis of frequency response. (D&S) .... Aug. 54

Gaging

Flying micrometer measures edge to edge thickness. (D&S) ..... Dec. 58
New thickness gage called five times faster. (WN) ..... Feb. 63

Graphic analysis

Plotter facilitates graphical analysis of frequency response. (D&S) .... Aug. 54
Power bond graphs: a new control language. D. Karnopp ..... May 79

Hydraulics

Hydraulic motor controls tube drawing. (D&S) ..... Mar. 49
Study hydrofluidic and electronic control systems for aircraft. (WN) .... Aug. 42

Industrial control

AC power control—triac or SCR's? D. Cooper ..... Aug. 80
Analog fluidics grades cylinder bores. (D&S) ..... Jan. 39
Batch processing speeds use of APT. (D&S) ..... Aug. 54
Camera keeps its cool. (D&S) ..... Dec. 56
Computer patents lash control industry. (WN) ..... July 39
Computer picks right resistors (D&S) Feb. 66
Computer programming series 7—software for a manufacturing line. E. C. McIrvine ..... Apr. 100
Computer replaces hardwired control on transfer line. (D&S) ..... July 56
Computer supervises oil well drilling. (WN) ..... Feb. 54
Continuous path, five-axis NC welder for aerospace. (D&S) ..... Oct. 90
Conversion system automates bulk weighers. (WN) ..... Feb. 53
Displays in action. O. E. McBrien & others ..... June 125
Eddy current probes check brake cylinders. (D&S) ..... Apr. 69
Fifteen ways to control moving materials. E. L. Ralston ..... Sept. 90
Fluidics positions roll without touching. (D&S) ..... Apr. 69
Four ways tubing has paid off. D. W. Pettigrew ..... Oct. 116
High pressure test reveals brake flaws. (D&S) ..... Jan. 40
Hydraulic motor controls tube drawing. (D&S) ..... Mar. 49
Indirectly coupled NC feedback loop. (D&S) ..... June 82
Industrial robots load brick kiln. ..May 68
Inverters and battery provide ac backup boiler controls. (D&S) ..... Nov. 64
Laser proposed for on-line balancing. (D&S) ..... Mar. 50
Lasers boost machine tool accuracy. P. N. Budzilovich ..... Dec. 62
Magnetized belt speeds materials handling. (WN) ..... Feb. 51

Materials handling control. S. J. Bailey Sept. 81
Multiprocessor computers for better on-line control. Hoffman & Ragel...Feb. 75
NC applied to ultrasonic testing. (D&S) June 78
NKK reports complete computer control of steel production. (WN) .....Nov. 44
New thickness gage called five times faster. (WN) .....Feb. 53
Noiseproof a digital electronic control system. L. O. Rexrode .....Nov. 66
Nuclear scales applied to screw conveyors. (WN) .....Feb. 51
On-line blending for production profit. Tillman & Lee .....Oct. 111
On-line computer scorecard updated. S. J. Bailey .....July 79
Pin pattern programs punch. (D&S) Mar. 49
Pneumatic control solves pc production problem. (D&S) .....June 77
Programmed car speeds steel annealing. (D&S) .....Jan. 40
Soaking pit control system assures uniform heating of ingots. (D&S) ..Aug. 56
Solenoid valve has one moving part. (D&S) .....Jan. 39
Standard adaptive control systems for metalworking. (D&S) .....Aug. 51
Steel companies order controls. (WN) Aug. 44
Telemetry in a can. (D&S) .....Oct. 87
Tough control jobs go pneumatic. J. A. Reason .....July 65
USASCII—8 interchange code adds an eighth bit. E. H. Clamons .....July 76
Weigh standard process control language. (WN) .....Sept. 51
Westinghouse forum emphasizes manufacturing systems. (WN) .....July 40

Information systems

AT&T's new tariff permits customer-owned attachments. (ABL) .....Oct. 151
Accuse AT&T of 'strangulation'. (WN) Jan. 28
Auto firms automate design, assembly, service. (WN) .....Apr. 56
Controlling data flow in a steel mill. H. G. Teschner .....Apr. 76
Displays in action. O. E. McBrien & others .....June 125
Eurocontrol computer for air space control. (WN) .....Apr. 60
FCC bans ban on foreign attachments. (WN) .....Aug. 37
Five ways to delay a signal. P. Bauer Apr. 92
GE regroups information systems equipment division. (WN) .....Apr. 58
GT&E introduces new carrier systems. (WN) .....Apr. 60
Government prods for standards. (ABL) Aug. 109
Graphic displays: matching man to machine for on-line control. D. E. Weisberg .....Nov. 79
Information systems design: PL/1 spoken here. Bond & Dyer .....Dec. 71
Input terminal accepts mark-sense cards. (D&S) .....Mar. 50
Integrated system streamlines railroad freight handling. E. L. Rogers...Jan. 56
Inter-airline reservation system nears contract award stage. (WN) ...Aug. 40
New recorder produces readable tape. (WN) .....Sept. 52
Practical data base design. D. S. Ward May 83
RACE narrows digital voice bandwidth. (WN) .....July 48
Satellite computers speed airline reservations. C. M. Cundall .....Nov. 88
Selecting the right display technique. B. M. Blake .....June 88
Specifying custom display systems. R. J. Masterson & others .....June 119
Status board concept applied to people finding. (D&S) .....Aug. 52
The lucrative loop around the loop. (ABL) .....July 111
Touch-tone sets give drug store dope. (D&S) .....Jan. 42
USASCII—8 interchange code adds an eighth bit. E. H. Clamons .....July 76
USASCII: federal government action on standards challenges computer manufacturers. J. N. Bairstow .....Aug. 84
Westinghouse forum emphasizes manufacturing systems. (WN) .....July 40
What's available for high-speed data transmission. L. E. Walz .....Oct. 94
What's available for in-plant data collection. L. Waltz .....Feb. 79

Instrumentation

Air pollution instrumentation: strong growth foreseen. (ABL) .....Sept. 127
CO_2 signpost for air pollution. (D&S) July 58
Controlling electrical noise in instrument circuits. B. Klipec .....Mar. 75
Eight ways to measure liquid level. L. T. Akeley .....July 72
Five ways to illuminate an instrument. H. N. Nicholson .....Nov. 86
Inertia meter predicts performance of escape system. (D&S) .....Aug. 52
Servo-controlled exoskeleton measures muscle forces. (D&S) .....Oct. 92
Test instrument report: biz keen on rental scene. (ABL) .....Jan. 101
Ultrasound will measure wind for fire control. (WN) .....Oct. 78

Integrated circuits (see also solid state devices)

IC regulator powers high performance systems. (D&S) .....Feb. 63
Solid state liquid sensing device. (D&S) Oct. 88
Texas Instruments sets solid state stride. (WN) .....May 48

Level

Eight ways to measure liquid level. L. T. Akeley .....July 72
Precision techniques for measuring liquid quantity. Cohn & Dunn ....Jan. 51

Logic and logic devices

Bond graphs for logic circuit design. A. Krigman .....Feb. 91
Designing asynchronous sequential logic circuits. Wareberg & Mergler ...Oct. 99
Sequence control for batch polymerization. F. H. Schreiner .....Sept. 96

Machine control

Batch processing speeds use of APT. (D&S) .....Aug. 54
Computer replaces hardwired control on transfer line. (D&S) .....July 56
Computers outdate hardwired controls. J. A. Reason .....Jan. 46
Computers take over NC. (WN) ..May 56
Continuous path, five-axis NC welder for aerospace. (D&S) .....Oct. 90
Curvilinear rate multiplier for precise interpolation. G. C. Winston ....Apr. 81
GE launches computer-directed NC activity. (WN) .....Oct. 70
Indirectly coupled NC feedback loop. (D&S) .....June 82
Lasers boost machine tool accuracy. P. N. Budzilovich .....Dec. 62
Laser-servo corrects errors on thread grinder. (D&S) .....Feb. 68
NC applied to ultrasonic testing. (D&S) June 78
Noiseproof a digital electronic control system. L. O. Rexrode .....Nov. 66
Standard adaptive control systems for metalworking. (D&S) .....Aug. 51

Marketing

AT&T's new tariff permits customer-owned attachments. (ABL) .....Oct. 151
Air pollution instrumentation: strong growth foreseen. (ABL) .....Sept. 127
Computer system houses plug builder-user gap. (ABL) .....Apr. 129
Display survey. (ABL) .....June 169
Hewlett-Packard computer to tackle process control. (WN) .....Oct. 69
Minicomputers—what all the noise is about. G. Lapidus .....Sept. 73
On-line computers in the lab: big jump in next five years. (ABL) .....Feb. 123
Philips bares computer business plans. (WN) .....Mar. 40
Programmable sequence controllers. (ABL) .....Mar. 109
Reliance Electric enters computer control system arena. (WN) .....Oct. 69
See big market for small core memory systems. (ABL) .....May 119
Test instrument report: biz keen on rental scene. (ABL) .....Jan. 101
The lucrative loop around the loop. (ABL) .....July 111
U.S. firms set up shop in Israel. (WN) June 70
Why they're losing money in fluidics. J. A. Reason .....Aug. 65
World computer war: Britain readies big gun. (WN) .....June 60

Materials handling

Controlling the flow rate of dry solids. Grader & Bateson .....Mar. 60
Fifteen ways to control moving materials. E. L. Ralston .....Sept. 90
Industrial robots load brick kiln. (D&S) May 68
Magnetized belt speeds materials handling. (WN) .....Feb. 51
Materials handling control. S. J. Bailey Sept. 81
Nuclear scales applied to screw conveyors. (WN) .....Feb. 51

Measuring

Eight ways to measure liquid level. L. K. Akeley .....July 72
Five ways to measure without touching. H. T. Adkins .....Feb. 88
Flying micrometer measures edge to edge thickness. (D&S) .....Dec. 58
Inertia meter predicts performance of escape system. (D&S) .....Aug. 52
Infrared radiation measures moisture. (D&S) .....Jan. 44
Laser used for wire measurement. (D&S) .....June 80
Lasers boost machine tool accuracy. P. N. Budzilovich .....Dec. 62
New thickness gage called five times faster. (WN) .....Feb. 53
pH meter goes closed loop. (D&S) Nov. 64
Precision techniques for measuring liquid quantity. Cohn & Dunn .....Jan. 51
Semiconductor strain gages measure pressure. (D&S) .....Dec. 55
Servo-controlled exoskeleton measures muscle forces. (D&S) .....Oct. 92
Thermal transmitters improved by smaller capillaries. (D&S) .....Sept. 68
Torque measurement without touching. (D&S) .....May 63
Watt transducer is self-checking. (D&S) Nov. 62

Meetings, news reports

FJCC displays wide range of equipment. (WN) .....Jan. 27
Fluidics show: topics announced. (WN) Nov. 56
First fluidics show draws big. (WN) Dec. 40
IFAC symposia to examine digital control. (WN) .....May 58
IFAC-IFIP symposium stresses digital control. (WN) .....July 50
ISA '68: emphasis on computer compatibility. (WN) .....Dec. 39
ISSCC: an inside-the-chip affair. (WN) Mar. 44

JACC adds applications "short course." (WN) ..... Apr. 62
JACC makes the most it can of practical problems. (WN) ..... Aug. 38
JACC sets survey sessions. (WN) . May 54
LSU digital workshop: bland but informative. (WN) ..... Mar. 44
New computers highlight IEA exhibition. (WN) ..... Aug. 37
Sixty-eight ISA: conference program deserves attention. (WN) ..... Oct. 80
Solid state circuits conference ..... Jan. 28
Wescon '68: marginal mecca for control. (WN) ..... Oct. 74

Memories

Plated wire memories gain ground in aerospace. (ABL) ..... Nov. 127
See big market for small core memory systems. (ABL) ..... May 119
Status report on random access mass storage. B. M. Blake ..... Mar. 65

Metals processing and finishing

Controlling data flow in a steel mill. H. G. Teschner ..... Apr. 76
Flying micrometer measures edge to edge thickness. (D&S ..... Dec. 58
NKK reports complete computer control of steel production. (WN) ..... Nov. 44
Oliver analyses raw iron. (D&S) .. July 58
SCR-controlled circuit breaker advances steelmaking. (WN) ..... Mar. 39
Soaking pit control system assures uniform heating of ignots (D&S) . Aug. 56
Steel companies order controls. (NW) Aug. 44
Woodward Corp. pushes toward integrated control. (WN) ..... July 44

Motor drives

What's available in adjustable speed ac drives. A. Kusko ..... Aug. 58

Multipliers

Curvilinear rate multiplier for precise interpolation. G. C. Winston .... Apr. 81
Pulse rate function multiplier is simple and accurate. (D&S) ..... Dec. 60
Simple circuit multiplies analog and digital signals. (D&S) ..... May 64

Optical systems

Camera keeps its cool. (D&S) .... Dec. 56
Candid cameras keep eye on crossings. (D&S) ..... Apr. 70
Five ways to illuminate an instrument. H. N. Nicholson ..... Nov. 86
IR controls diazo-paper coating machine. (D&S) ..... Dec. 58
Laser proposed for on-line balancing. (D&S) ..... Mar. 50
Laser-servo corrects errors on thread grinder. (D&S) ..... Feb. 68
Laser used for wire measurement. (D&S) ..... June 80
Lasers boost machine tool accuracy. P. N. Budzilovich ..... Dec. 62
New phosphor makes infrared visible. (WN) ..... June 72

Optimizing control

Manual time-optimum control of chemical processes. P. R. Latour ..... Nov. 83

Papermaking

Computer programming series 13—ddc software for a paper machine. Ochtman & Sullivan ..... Nov. 90
Foxboro to equip three paper mills. (WN) ..... Dec. 48
IR controls diazo-paper coating machine. (D&S) ..... Dec. 58
Papermill computer worked perfectly—on paper. (WN) ..... June 57

Patents

Computer patents lash control industry. (WN) ..... July 39
Hybrid patent protection proposed for computer programs. (WN) ..... Nov. 43
Key control patents issued. (WN) . Dec. 46

Pneumatics
(see also Fluidics)

Pneumatic control solves pc production problem. (D&S) ..... June 77
Superheat control of a cryogenic expansion turbine. (D&S) ..... Sept. 66
Tough control jobs go pneumatic. J. A. Reason ..... July 65

Pollution control

Air pollution instrumentation: strong growth foreseen. (ABL) ..... Sept. 127
CO_2 signpost for air pollution. (D&S) July 58
Computer monitors New York's air pollution. (WN) ..... Dec. 42
The urban crisis: opportunity for control technology. W. Kramer .... Mar. 56

Power plant control

Computer control loses some steam at LP&L. (WN) ..... May 45
Duke Power orders DDC system, training simulator. (WN) ..... May 46
Inverters and battery provide ac backup boiler controls. (D&S) ..... Nov. 64
Monitoring process data—a practical design approach. F. A. Kramer .... Oct. 105

Power supplies

IC regulator powers high performance systems. (D&S) ..... Feb. 63
Inverters and battery provide ac backup boiler controls. (D&S) ..... Nov. 64
Power backup for supervisory computer. (D&S) ..... Aug. 56

Prediction

Closing the loop with predictive controllers. C. R. Kelley ..... May 75

Process control

A look at electric valve actuators. C. S. Beard ..... Apr. 83
A nomograph for relay-controlled proportional valves. E. V. Kosso .. Sept. 101
Another look at electric valve actuators. C. Beard ..... Dec. 79
Computer control loses some steam at LP&L. (WN) ..... May 45
Computer leasing: Honeywell, GE change courses. (WN) ..... Jan. 27
Computer monitors and predicts gas demand. (D&S) ..... Nov. 60
Computer patents lash control industry. (WN) ..... July 39
Computer programming series 9—a ddc software package for a float glass process. N. R. Patel ..... July 68
Computer programming series 12—new process language uses English terms. T. G. Gaspar & others ..... Oct. 118
Computer programming series 14—needed: a process language standard. E. A. Weiss ..... Dec. 84
Controls study to specify ideal plant. (WN) ..... Sept. 54
Controlling electrical noise in instrument circuits. B. Klipec ..... Mar. 75
Controlling the flow rate of dry solids. Grader & Bateson ..... Mar. 60
Demand widens for instrument evaluation. (WN) ..... June 68
Disclose second DDC system at Ideal Cement. (WN) ..... Feb. 56
Displays in action. O. E. McBrien & others ..... June 125
Duke Power orders DDC system, training simulator. (WN) ..... May 46
Eight ways to measure liquid level. L. T. Akeley ..... July 72
Europe has more to show in fluidics. (WN) ..... July 42
Fifteen ways to control moving materials. E. L. Ralston ..... Sept. 90
Four ways tubing has paid off. D. W. Pettigrew ..... Oct. 116
Foxboro automates bleach house .. June 58
Foxboro cites success at Fawley ... May 48
Foxboro to equip three paper mills. (WN) ..... Dec. 48
GE unveils new supervisory control gear. (WN) ..... June 62
Honeywell unveils new process control computer package. (WN) ..... Nov. 50
Hybrid computers aid process control. E. B. Sharpe ..... Aug. 69
IR controls diazo-paper coating machine. (D&S) ..... Dec. 58
Infrared radiation measures moisture. (D&S) ..... Jan. 44
Low cost analog computer controls batch process. (D&S) ..... Dec. 56
Manual time-optimum control of chemical processes. P. R. Latour ..... Nov. 83
Materials handling control. S. J. Bailey Sept. 81
Miniature tape cartridges sound the alarm. (D&S) ..... Apr. 74
Monitoring process data—a practical design approach. F. A. Kramer .... Oct. 105
Multiprocessor computers for better on-line control. Hoffman & Ragel ... Feb. 75
New automatic control valve announced. (WN) ..... May 46
Oliver analyses raw iron. (D&S) .. July 58
On-line blending for production profit. Tillman & Lee ..... Oct. 111
On-line computer scorecard updated. S. J. Bailey ..... July 79
pH meter goes closed loop. (D&S) Nov. 64
Papermill computer worked perfectly—on paper. (WN) ..... June 57
Pneumatic crossbar controls fermentation sequence. Yamashita & Ito .. Jan. 68
SCR-controlled circuit breaker advances steelmaking. (WN) ..... Mar. 39
Self-synchronizing control offers new control capabilities. C. L. Mamzic May 70
Set DDC system for power plant. (WN) Jan. 27
Set on-line computer for nuclear generator. (WN) ..... Mar. 40
Sequence control for batch polymerization. F. H. Schreiner ..... Sept. 96
Siemens computers find wide application. (WN) ..... Mar. 40
Soaking pit control system assures uniform heating of ingots. (D&S) .. Aug. 56
Solid state liquid sensing device. (D&S) Oct. 88
Steel companies order controls .... Aug. 44
Superheat control of a cryogenic expansion turbine. (D&S) ..... Sept. 66
Textile plant expands computer control. (WN) ..... Mar. 39
USASC II—8 interchange code adds an eighth bit. E. H. Clamons ..... July 76
Weigh standard process control language. (WN) ..... Sept. 51
Westinghouse sells transit concept, BOF controls. (WN) ..... Mar. 42
Woodward Corp. pushes toward integrated control. (WN) ..... July 44

Production control
(see also Information systems)

Computer picks right resistors (D&S) Feb. 66
Computer programming series 7—software for a manufactering line. E. C. McIrvine ..... Apr. 100
Conversion system automates bulk weighers. (WN) ..... Feb. 53
Magnetized belt speeds materials handling. (WN) ..... Feb. 51
New thickness gage called five times faster. (WN) ..... Feb. 53
Nuclear scales applied to screw conveyors. (WN) ..... Feb. 51
On-line blending for production profit. Tillman & Lee ..... Oct. 111
Pneumatic control solves pc production problem. (D&S) ..... June 77
Telemetry in a can. (D&S) ..... Oct. 87
Westinghouse forum emphasizes manufacturing systems. (WN) ..... July 40

Programmed systems

Pin pattern programs punch. (D&S) Mar. 49
Pneumatic crossbar controls fermentation sequence. Yamashita & Ito ..Jan. 68
Programmed car speeds steel annealing. (D&S) .....Jan. 40
Sequence control for batch polymerization. F. H. Schreiner .....Sept. 96

Robots

Industrial robots load brick kiln. (D&S) May 68

Servomechanisms (see also Digital servos)

Circuit for synchro-to-digital conversion. F. G. Roberts .....Jan. 65
Fluidics positions roll without touching. (D&S) .....Apr. 69
High resolution stepper helps set type. (D&S) .....Jan. 44
Indirectly coupled NC feedback loop. (D&S) .....June 82
Laser proposed for on-line balancing. (D&S) .....Mar. 50
Laser-servo corrects errors on thread grinder. (D&S) .....Feb. 68
Self-organizing controllers—part II. R. Barron .....Mar. 69

Signal-noise improvement

Controlling electrical noise in instrument circuits. B. Klipec .....Mar. 75
Demand widens for instrument evaluation. (WX) .....June 68
Line frequency noise rejection in A-D converters. D. Velasevic .....Aug. 73
Noiseproof a digital electronic control system. L. O. Rexrode .....Nov. 66

Simulation

Auto simulator tests driver reaction. (D&S) .....June 78
Digital simulation checks aircraft combat role. (D&S) .....Nov. 60
Special synchros for function generation. C. Lang .....Dec. 75

Solid state devices

High speed trains: too much for today's ser's. (WX) .....Nov. 52
Solid state liquid sensing device. (D&S) Oct. 88

Space vehicle control

A look into Apollo control systems. G. Lapidus .....Dec. 67
Fluidic amplifier works at zero pressure. (D&S) .....Mar. 52
Inertia meter predicts performance of escape system. (D&S) .....Aug. 52

Speed-control

Six ways to drive tape. F. Moritz .Mar. 82
What's available in adjustable speed ac drives. A. Kusko .....Aug. 58

Standards

Computer programming series 14—needed: a process language standard. E. A. Weiss .....Dec. 84
Control valve sizing: new standard planned. (WX) .....Dec. 46
Government prods for standards. (ABL) Aug. 109
USASCII: federal government action on standards challenges computer manufacturers. J. N. Bairstow ..Aug. 84
What's new in control standards. E. Mastascusa .....May 95

Statistical techniques

Self-organizing controllers—part I. R. Barron .....Feb. 70
Self-organizing controllers—part II. R. Barron .....Mar. 69

Supervisory control

Computer supervises oil well drilling. (WX) .....Feb. 54
FCC bans ban on foreign attachments. (WX) .....Aug. 37
GE unveils new supervisory control gear. (WX) .....June 62
Power backup for supervisory computer. (D&S) .....Aug. 56

Synchronizing

Self-synchronizing control offers new control capabilities. C. L. Mamzic May 70

Systems

ANALYSIS

Compare systems by cost-to-own. W. Laubendorfer & others .....Feb. 84
Digital simulation checks aircraft combat role. (D&S) .....Nov. 60
Inverting functional diagrams eases control analysis. J. Thoma .....Nov. 75
Manual time-optimum control of chemical processes. P. R. Latour .....Nov. 83
Plotter facilitates graphical analysis of frequency response. (D&S) ....Aug. 54
Power bond graphs: a new control language. D. Karnopp .....May 79
Selecting the right display technique. B. M. Blake .....June 88
Three ways to do root locus on computers. G. E. Cook & others .....Jan. 70

DESIGN

Bond graphs for logic circuit design. A. Krigman .....Feb. 91
Designing asynchronous sequential logic circuits. Wareberg & Mergler ...Oct. 99
Monitoring process data—a practical design approach. F. A. Kramer ....Oct. 105
Noiseproof a digital electronic control system. L. O. Rexrode .....Nov. 66
Practical data base design. D. S. Ward May 83
Self-organizing controllers-part I. R. Barron .....Feb. 70

SPECIFICATIONS

Specifying custom display systems. R. J. Masterson & others .....June 119

Tape recording and reading (see also Information systems)

Miniature tape cartridges sound the alarm. (D&S) .....Apr. 74
New recorder produces readable tape. (WX) .....Sept. 52
Six ways to drive tape. F. Moritz .Mar. 82
Video recorder checks out assembly machine. (D&S) .....Apr. 70

Telemetering (see also Information systems)

Aerospace systems find applications at dam sites. (WX) .....Sept. 56
GE unveils new supervisory control gear. (WX) .....June 62
Telemetry in a can. (D&S) .....Oct. 87

Temperature

Camera keeps its cool. (D&S) ....Dec. 56
Soaking pit control system assures uniform heating of ingots. (D&S) .Aug. 56
Temperature controls for airplane windows reduce replacement. (D&S) Dec. 55
Thermal transmitters improved by smaller capilaries. (D&S) .....Sept. 68

Testing

Auto simulator tests driver reaction. (D&S) .....June 78
Eddy current probes check brake cylinders. (D&S) .....Apr. 69
F-111 computers checked out in test complex. (D&S) .....May 63
Fast machine verifies a billion connections. (D&S) .....Feb. 64
High pressure test reveals brake flaws. (D&S) .....Jan. 40
Micro flaws checked by macro technique. (D&S) .....Sept. 68
NC applied to ultrasonic testing. (D&S) June 78
On-line computer tests carburetors. (D&S) .....Apr. 72
Ultrasonics finds faults in plywood (D&S) .....Feb. 68

Transducers (see also Digital transducers)

Deflection transducers tell plane's weight. (D&S) .....Apr. 70
Eddy current probes check brake cylinders. (D&S) .....Apr. 69
Electric-to-fluidic transducer uses frequency modulation. (D&S) ....Sept. 65
Five ways to measure without touching. H. Adkins .....Feb. 88
Hall effect generator on chip works as keyboard switch. (D&S) .....Oct. 90
Improved vortex rate sensor. .....Oct. 88
Laser used for wire measurement. (D&S) .....June 80
Semiconductor strain gages measure pressure. (D&S) .....Dec. 55
Solid state liquid sensing device. (D&S) Oct. 88
Thermal transmitters improved by smaller capilaries. (D&S).....Sept. 68
Torque measurement without touching. (D&S) .....May 63
Watt transducer is self-checking ..Nov. 62

Transportation

Auto firms automate design, assembly, service. (WX) .....Apr. 56
Auto simulator tests driver reaction. (D&S) .....June 78
Automatic traffic control: Sperry moves back into the breach. (WX) ...Sept. 62
Candid cameras keep eye on crossings. (D&S) .....Apr. 70
Deflection transducers tell plane's weight. (D&S) .....Apr. 70
Eddy current probes check brake cylinders. (D&S) .....Apr. 69
Encoded tracks tell train location. (D&S) .....Mar. 54
High speed trains: too much for today's ser's. (WX) .....Nov. 52
Integrated system streamlines railroad freight handling. E. L. Rogers ...Jan. 56
Penn Central's computer controlled freight yard. (D&S) .....June 80
Small computer keeps tabs on vehicle maintenance. (D&S) .....July 60
Sperry loses traffic control contract. (WX) .....Feb. 58
The urban crisis: opportunity for control technology. W. Kramer ....Mar. 56
Three-hundred ft cable operates barge's throttle. (D&S) .....May 68
Transit systems scramble to automate. (WX) .....June 58
Westinghouse sells transit concept, BOF controls. (WX) .....Mar. 42

Valves

A look at electric valve actuators. C. S. Beard .....Apr. 83
A nomograph for relay-controlled proportional valves. E. V. Kosso ...Sept. 101
Another look at electric valve actuators. C. Beard .....Dec. 79
Control valve sizing: new standard planned. (WX) .....Dec. 46
New automatic control valve announced. (WX) .....May 46
Solenoid valve has one moving part. (D&S) .....Jan. 39

Ways to

Eight ways to measure liquid level. L. T. Akeley .....July 72
Fifteen ways to control moving materials. E. L. Ralston .....Sept. 90
Five ways to delay a signal. P. Bauer Apr. 92
Five ways to measure without touching. H. Adkins .....Feb. 88
Four ways to multiplex low-level signals. H. T. Abernethy .....May 92
Six ways to drive tape. F. Moritz .Mar. 82
Three ways to do root locus on computers. G. E. Cook & others .....Jan. 70

Weighing

Conversion system automates bulk weighters. (WX) .....Feb. 53
Nuclear scales applied to screw conveyors (WX) .....Feb. 51

AUTHOR INDEX

Abernethy, H. Four ways to multiplex low-level signals.....May 92
Adkins, H. T. Five ways to measure without touching.....Feb. 88
